Subject: RE: Meeting place for Saturday

Tank material is Polyethylene, these are the same tanks that were at 1101 carter rd (saunter's) and at [Ex. 6 - Personal Privacy] at the [Ex. 6 - Personal Privacy] Rd site. They are advertised as water tanks.

well have I got a place for you....200 Shady Lane in Fruitland, MD. Its part of the old sewage plant works...hopefully it won't stink too bad.
MDE is working on getting us permission to use water from Fruitland or Salisbury. I will likely know more by the end of the day.
What is the composition of the tanks? Do you know if they are compatible for drinking water?
thanks

Subject: Meeting place for Saturday

Rich,

As per our earlier phone conversation with meeting about 1 pm in Salisbury, have you determined a meeting site yet?

Did you have a chance to talk with the local's to see if there is a warehouse or such that we can use in the interim?

I have located tanks near the Salisbury MD to provide about 1000 to 1500 gallons holding capacity at each of the five houses. They can be picked up Tomorrow as I have them on a hold for sale for 24 hours. Kemron is continue resourcing of Potable water supply vendors, electricians, plumbers etc s they can be utilized when needed.

One other question that I had, was is there a location that we could possibly obtain water from the City of Salisbury to provide municipal water for the houses?

Thanks
